

ASSEMBLY INSTRUCTION

BALI SHIP KITE

DRAWING 1

Ship kite comes folded as in Drawing 1.

Swivel cross bars of Ship to assemble base of Ship and hook rubber loops around the cross bars.

Put mast (A) into hole (X) and mast (B) into hole (Y). Hook rubber loop on front sail to the bow of Ship and hook rubber loop on back sail to the stern of the Ship.

DRAWING 2

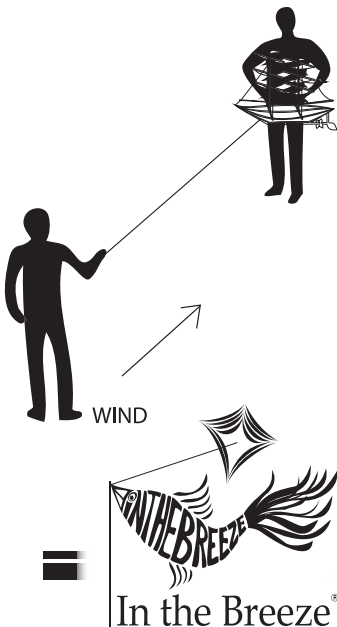

Place string loop at top of front sail over the bamboo slot on top of front mast. Slide bamboo sticks on sail into bamboo slots on front of mainsail. Hook rubber loops on both sides of front sail to the Ship cross bars. Repeat process for back sail.

DRAWING 3

Unwrap bridle line from front of ship and tie an overhand knot to make a loop in the bridle as shown in Drawing 3. Attach kite line (not included) to bridle loop on front of Ship and this Ship is ready to sail.

Bali kites also make great room decor!

WARNING

CHOKING HAZARD - Small parts. Not for children under 3 years.

- DON'T** use near overhead power lines or during thunderstorms
- DON'T** fly kites around trees, buildings, highways or airports
- DON'T** fly kites in crowded areas to avoid crashing into spectators
- DON'T** try to recover kites from power lines or high or dangerous places

DO fly your kite in open areas - a park or beach are ideal flying sites
DO have fun while being safe!

Colors and sizes may vary from images shown on package or in advertising.

Beaufort Wind Scale

Beaufort Number	Wind Speed (mph)	Flag Behavior
1	1-3	
2	4-7	
3	8-12	
4	13-18	
5	19-24	
6	25-31
